PLANT AND SOIL

Contents Volume 261, Nos. 1–2 April 2004

Plant-soil interactions for better soil quality and food security

Guest editors:
Yong-Guan Zhu & F. Andrew Smith

Preface
F. Andrew Smith and Yong-Guan Zhu **vii–viii**

Fundamental soil/plant interactions

Rhizosphere caraboxylate concentrations of chickpea are affected by genotype and soil type
M. Wouterlood, G.R. Cawthray, S. Turner, H. Lambers and E.J. Veneklaas **1–10**

Distribution patterns of available P and K in rape rhizosphere in relation to genotypic difference
W. Shi, X. Wang and W. Yan **11–16**

Soil isotopically exchangeable zinc: A comparison between *E* and *L* values
S. Sinaj, A. Dubois and E. Frossard **17–28**

Calcium, magnesium and microelement uptake as affected by phosphorus sources and interspecific root interactions between wheat and chickpea
L. Li, C. Tang, Z. Rengel and F.S. Zhang **29–37**

Effect of manganese spatial distribution in the soil profile on wheat growth in rice–wheat rotation
S. Lu, X. Liu, L. Li, F. Zhang, X. Zeng and C. Tang **39–46**

Relationships between soil characteristics, topography and plant diversity in a heterogeneous deciduous broad-leaved forest near Beijing, China
B.J. Fu, S.L. Liu, K.M. Ma and Y.G. Zhu **47–54**

Responses of photosynthetic rates and yield/quality of main crops to irrigation and manure application in the black soil area of Northeast China
X. Liu, S.J. Herbert, J. Jin, Q. Zhang and G. Wang **55–60**

Water-use efficiency and carbon isotope discrimination in two cultivars of upland rice during different developmental stages under three water regimes
B. Zhao, M. Kondo, M. Maeda, Y. Ozaki and J. Zhang **61–75**

Genetic variability for root hair traits as related to phosphorus status in soybean
L. Wang, H. Liao, X. Yan, B. Zhuang and Y. Dong **77–84**

The kinetics of aluminum adsorption and desorption by root cell walls of an aluminum resistant wheat (*Triticum aestivum* L.) cultivar
S.J. Zheng, X. Lin, J. Yang, Q. Liu and C. Tang **85–90**

An assessment of the usefulness of solution culture in screening for phosphorus efficiency in wheat
J.E. Hayes, Y.-G. Zhu, T. Mimura and R.J. Reid 91–97

Interactions between selenium and iodine uptake by spinach (*Spinacia oleracea* L.) in solution culture
Y.-G. Zhu, Y. Huang, Y. Hu, Y. Liu and P. Christie 99–105

Effects of soil contaminants and amendments

Root distributions and elemental accumulations of Chinese brake (*Pteris vittata* L.) from As-contaminated soils
X.-Y. Liao, T.-B. Chen, M. Lei, Z.-C. Huang, X.-Y. Xiao and Z.-Z. An 109–116

EDTA and industrial waste water improving the bioavailability of different Cu forms in contaminated soil
Y.X. Chen, J.Y. Shi, W.D. Zhang, Q. Lin and G.M. Tian 117–125

Behavior of Cu and Zn under combined pollution of 2,4-dichlorophenol in the planted soil
Y.X. Chen, Q. Lin, Y.F. He and G.M. Tian 127–134

Elevated selenium and other mineral element concentrations in soil and plant tissue in bone coal sites in Haoping area, Ziyang County, China
W.X. Fang and P.W. Wu 135–146

Is ethylene involved in regulation of root ferric reductase activity of dicotyledonous species under iron deficiency?
X. Li and C. Li 147–153

Inhibitory effects of reactive X-3B red dye (RRD) on iron uptake by three crops
Q.X. Zhou, J. Xu and Y. Cheng 155–162

Effects of low-molecular-weight organic acids on uptake of lanthanum by wheat roots
Z. Wang, S. Zhang and X.-Q. Shan 163–170

Toxic effects of cadmium on *Morus alba* L. and *Bombyx moril* L.
K.R. Wang, H. Gong, Y. Wang and S.E.A.T.M. van der Zee 171–180

Enhanced uptake of soil Pb and Zn by Indian mustard and winter wheat following combined soil application of elemental sulphur and EDTA
Y. Cui, Q. Wang, Y. Dong, H. Li and P. Christie 181–188

Assessment of the contamination and genotoxicity of soil irrigated with wastewater
Y. Chen, C. Wang, Z. Wang and S. Huang 189–196

Microbial interactions

Development of specific rhizosphere bacterial communities in relation to plant species, nutrition and soil type
P. Marschner, D. Crowley and C.H. Yang 199–208

Arbuscular mycorrhiza can depress translocation of zinc to shoots of host plants in soils moderately polluted with zinc
P. Christie, X. Li and B. Chen 209–217

Effects of EDTA application and arbuscular mycorrhizal colonization on growth and zinc uptake by maize (*Zea mays* L.) in soil experimentally contaminated with zinc
B. Chen, H. Shen, X. Li, G. Feng and P. Christie **219–229**

Acidic vesicles in living hyphae of an arbuscular mycorrhizal fungus, *Gigaspora margarita*
K. Saito, Y. Kuga-Uetake and M. Saito **231–237**

Establishment of monoxenic culture between the arbuscular mycorrhizal fungus *Glomus sinuosum* and Ri T-DNA-transformed carrot roots
Y. Bi, X. Li, H. Wang and P. Christie **239–244**

Colonisation with the arbuscular mycorrhizal fungus *Glomus mosseae* (Nicol. & Gerd.) enhanced phosphorus uptake from dry soil in *Sorghum bicolor* (L.)
E. Neumann and E. George **245–255**

Survey of arbuscular mycorrhizal fungi in deforested and natural forest land in the subtropical region of Dujiangyan, southwest China
Y. Zhang, L.-D. Guo and R.-J. Liu **257–263**
